AutoDrive Motors – UAT Plan and Test Scripts

User acceptance testing for the AutoDrive Motors Salesforce build (TAP Group 3). It checks that the system does what AutoDrive asked for, using the business goals, requirements and user stories in the v8 workbook (`AutoDrive_Requirements_UserStories_v8.xlsx`). Every script is written in plain words and is run as the user it is meant for, never as an administrator.

How to use this document

1. Section 9 lists **every user story**. The column **Built?** shows what we believe is built. Go down it once and mark each row **Yes**, **No** or **Partly**. Rows marked **No** become **Blocked** and are not handed to the testers.
2. Each tester only needs section 7 (how to run a script) and their own scripts in section 10.
3. Record results in the **Actual** and **Pass/Fail** columns. Record problems in the defect log (section 11).

1. Purpose and business goals

Purpose. Confirm that each requirement works for the person who will use it, and decide whether AutoDrive can sign off the build.

Goal	What the business wants
O1 Operational visibility	One connected view of customers, vehicles, sales, finance and service
O2 Process consistency and control	Clear processes, owners and business rules that the system enforces
O3 Less manual follow-up	Approvals, payments, reminders and issues tracked by the system
O4 Management visibility	Timely figures on stock, sales, finance and service
O5 Adoption and handover	A solution people understand and can run

Area	What it covers	Stories
A. Enquiries and prospects	Website, walk-in and social enquiries, qualifying, assigning reps	US-11, US-23, US-30, US-31, US-32
B. Vehicles and stock	Live availability, sold status, low stock, imports, Finance view of stock	US-01, US-07, US-12, US-26, US-38
C. Sales and discounts	Discount approvals, fleet customers, no discount on instalments, vehicle change	US-02, US-08, US-16, US-20, US-25, US-39
D. Finance and payments	Payments, part and extra payments, instalment rules, reminders, late and default, reconciliation, legal, completion	US-03, US-05, US-09, US-15, US-17, US-19, US-28, US-29, US-36, US-37
E. Customer service	Logging and routing requests, reference numbers, history, escalation, response times, satisfaction, knowledge base	US-04, US-06, US-10, US-13, US-14, US-18, US-22, US-24, US-33, US-34, US-35
F. Management	One dashboard for the whole business	US-21

2. Scope

In scope

- Every user story in the v8 workbook with a MUST, SHOULD or COULD priority that is marked **Built** in section 9.
- The business rules the build enforces: 30% minimum down payment, 12-month maximum (including after renegotiation), guarantor before sign-off, Head of Finance sign-off before monthly payments, one down payment per sale, no discount on instalment sales, approval above 5%, the 3-day reminder, 1/7/30-day late steps, legal escalation after 90 days.
- What each role can and cannot see or change (security matrix).
- Two end-to-end journeys: a sale from website enquiry to first monthly payment, and a complaint from the website to closure.

Out of scope (agreed)

- More than one showroom, used vehicles, sales commission.
- Text (SMS) and WhatsApp messages. Reminders and notices are sent by email only (team decision, 18 Oct 2026).
- Vehicle handover and ownership documents (workbook "Won't Have"). Only the Ownership Documents Status field is tested.
- Customer logins. Customers use the website forms and email only.
- Performance, load and data migration testing.

3. Where the testing happens

- **Environment:** Salesforce sandbox **Group3SB**, in the **AutoDrive Motors** app, on a desktop browser.
- **Website:** https://dk1791276250211--group3sb.sandbox.my.site.com/s/ (open it in a private or incognito window).
- **How to test as a user:** the UAT coordinator opens Setup > Users and clicks **Login** next to the test user. A blue banner shows who you are. Click **Log out as …** in the banner to return.
- **Evidence:** a screenshot for every failed step, and for the key result of every script.
- **Finding a record:** lists open on *Recently Viewed*. Click the list name and choose **All**, or use the search bar at the top.

4. Testers

Role	Test user (login)	Tester	Scripts they run
Customer (website)	No login, private window	Henry	Website enquiry and support request
Front Desk	Front Desk Staff test user	Henry	Walk-in enquiries
Social Media Handler	Social Media Handler test user	Henry	Instagram enquiries
Sales Rep	test.salesrep@autodrive.group3sb.test	Henry	Leads, sales, discounts, fleet, imports, vehicle change
Showroom Manager	test.showroommanager@autodrive.group3sb.test	Henry	Prospects, stock, low-stock alert, first discount approval
Finance Team	test.financeteam@autodrive.group3sb.test	Obed	Plans, payments, imports, Finance approvals
Head of Finance	test.headoffinance@autodrive.group3sb.test	Obed	Sign-off, rules, final approval, reconciliation, legal
Legal Team	test.legalteam@autodrive.group3sb.test	Obed	Viewing legal escalations
Customer Service Agent	test.csagent@autodrive.group3sb.test	Shedrack	Cases, customer history, knowledge base
Head of Customer Service	test.headofcs@autodrive.group3sb.test	Shedrack	Case overview, escalation, times, satisfaction, articles
Management	test.management@autodrive.group3sb.test	Sponsor	Dashboard, read-only checks
UAT coordinator (facilitator)	Admin	Hillary	Logs in as users, prepares data, records results and defects
Business sponsor (AutoDrive)			Watches, accepts results, signs off

5. Test data

Load before testing. Do not change it between runs except by running the scripts. Customer emails that should reach a tester use the tester's own inbox.

Customers

ID	Record	Details
TD-01	Returning customer	**Daniel Okoro** (contact, email ewryen@gmail.com), with past enquiries and a case
TD-02	Fleet customer	**Lagos Ride Hailing Ltd** (Fleet/Corporate account), with an Agreed Discount Rate
TD-03	Fleet customer	**Kano Logistics Ltd** (Fleet/Corporate account)
TD-04	New walk-in	A new person typed in during the test, e.g. **Amina Sule**, phone 0802 555 0101
TD-05	Website visitor	The tester's own name and email, typed into the website forms

Vehicles and stock

ID	Record	Details
TD-10	Models with stock	Toyota Corolla 2026, Kia Sportage 2026, Toyota Hilux 2026, Honda CR-V 2026 (several cars Available each)
TD-11	Model for the low-stock test	Any model; the tester sets its Low Stock Threshold above its Available Stock
TD-12	Model with no stock	A model with no Available cars, for the import request

Sales (fresh set)

Run `scripts/apex/fresh_sales_test_records.apex` before a round. It creates, owned by the Sales Rep: **Sale 1 (open, full payment, at Offer)**, **Sale 2 (7.5% discount approved)**, **Sale 3 (open)** and an open **Lead**, all named "AD Rerun

<date> …".

Instalment customers (`scripts/apex/instalment_test_plans.apex`; every plan follows all the rules)

ID	Customer	Set up for
TD-20	**Chiamaka Okonkwo**	On track; Month 1 due in a few days (3-day reminder; part and extra payment). Email: tester's inbox
TD-21	**Segun Ajayi**	Month 2 due today (full payment; or missed-payment notice the next day if not paid)
TD-22	**Emmanuel Udo**	Last month due (plan completion and completion email)
TD-23	**Hauwa Lawal**	Deposit paid, waiting for Head of Finance sign-off
TD-24	**Funke Ayo**	One month about 7 days late (late list; guarantor notice)
TD-25	**Folake Ogunleye**	One month 30+ days late, alert not sent yet (default alert the next morning)
TD-26	**Suleiman Bello**	Defaulted, a month unpaid for 90+ days (legal escalation)
TD-27	**Zainab Bello**	Plan created, deposit not paid yet (waiting for deposit)
TD-28	**Ngozi Okeke**	Signed off, on track, car reserved

Cases: created during the tests from the website (section 10, UAT-E-01).
Overnight jobs. Some results only appear after the automatic morning jobs run (marked **(next day)**): marking late, the 3-day reminder, the 1/7/30-day notices, the low-stock alert, the daily plan refresh.

6. Entry criteria

Testing starts only when all of these are true. The coordinator ticks each one.

[ ] Every story in the round is marked **Built** in section 9. The others are **Blocked**.
[ ] The sandbox is **frozen**: no one changes the setup during a round, except to fix a logged defect.
[ ] Every test user in section 4 exists, can log in, and has the right profile and permission set group.
[ ] Test data in section 5 is loaded.
[ ] Every flow, validation rule and approval process in scope is **Active**.
[ ] Email is switched on: Setup > Deliverability > Access level = **All email**.
[ ] Each tester has their scripts.
[ ] Smoke test passed: each test user logs in, opens the AutoDrive Motors app and sees their tabs.
[ ] No open Critical defect.
[ ] The defect log (section 11) is ready, with Hillary as the owner for triage.

7. How to run a script

1. Log in as the user named in the script. Never as an administrator, unless the script says so.
2. Follow the steps in order. Do not skip.
3. After each step, compare what you see with **Expected**. Write what you actually saw in **Actual**.
4. Mark the step **Pass** or **Fail**. The script passes only if every step passes.
5. For a failure: take a screenshot, note the script ID and step number, and tell the coordinator, who logs a defect.
6. After a defect is fixed, run the **whole** script again (next round). Only the tester closes a defect.

Defect severity

Severity	Meaning	Example
Critical	A business rule is broken, or work cannot continue	A car can be sold twice; Finance can sign off a plan
High	A MUST story fails, with no workaround	A discount above 5% is not sent for approval
Medium	Works wrongly, but there is a workaround	A list shows the wrong column
Low	Wording, layout or cosmetic	A typo on a label

Defect or change request? A defect is when the system does not do what was agreed. A change request is something new or different from what was agreed (for example "can it also text the customer?"). Change requests are logged as **CR-xx** and decided later; they do not block sign-off.

8. Exit criteria

Testing ends, and sign-off is requested, when all of these are true:

- Every script in scope has been run and its result recorded. Blocked scripts are listed with the reason and a date.
- **100%** of MUST scripts have passed.
- At least **90%** of SHOULD and COULD scripts have passed, and the rest have an agreed plan.

- No open **Critical** or **High** defects.
- Every Medium and Low defect is fixed, or accepted in writing by AutoDrive with a fix date.
- Every business rule in section 2 has been proved at least once.
- Both end-to-end scripts have passed.
- The results summary (section 11) is complete and the sign-off table is signed.

If not met, testing continues after fixes, and only the failed and affected scripts are run again.

9. Script index (all user stories)

Built? is our current belief: Yes / Partly / To check. Mark it yourself before each round. **Status** is Ready (Built = Yes) or Blocked.

Script	Story	Scenario	Priority	Role	Built?	Status
UAT-B-01	US-01	A car shows Sold as soon as the sale closes, and can't be sold again	MUST	Sales Rep	Yes	Ready
UAT-C-01	US-02	See where a discount approval sits	MUST	Sales Rep, Showroom Manager	Yes	Ready
UAT-D-01	US-03	A payment is recorded once and balances update themselves	MUST	Finance Team	Yes	Ready
UAT-E-02	US-04	Agent sees the customer's history, not payment amounts	MUST	CS Agent	Yes	Ready
UAT-D-02	US-05	One list of late and defaulting customers	MUST	Head of Finance	Yes	Ready
UAT-E-01	US-06	A request from any channel becomes a case and goes to the right team	MUST	Customer, CS Agent	Yes	Ready
UAT-B-02	US-07	Rep sees live availability before talking to a customer	MUST	Sales Rep	Yes	Ready
UAT-C-02	US-08	Finance sees which approvals are waiting for them	MUST	Finance Team	Yes	Ready
UAT-D-03	US-09	Bank total compared with recorded payments	MUST	Head of Finance	Yes	Ready
UAT-E-03	US-10	Head of CS sees every case's owner and status	MUST	Head of CS	Yes	Ready
UAT-A-01	US-11	A website enquiry reaches an online rep automatically	MUST	Customer, Sales Rep	Yes	Ready
UAT-B-03	US-12	Low-stock alert for a model	SHOULD	Showroom Manager	Yes	Ready
UAT-E-04	US-13	First response and resolution times recorded	SHOULD	Head of CS	Yes	Ready
UAT-E-05	US-14	Agent searches the knowledge base	SHOULD	CS Agent	Yes	Ready
UAT-D-04	US-15	Reminder 3 days before a payment is due	SHOULD	Finance Team	Yes (email only)	Ready (next day)
UAT-C-03	US-16	A fleet customer's information in one place	SHOULD	Sales Rep	Yes	Ready
UAT-D-05	US-17	Alert when a customer first defaults	SHOULD	Finance Team	Yes	Ready (next day)
UAT-E-06	US-18	Head of CS maintains articles	SHOULD	Head of CS	Yes	Ready
UAT-D-04	US-19	Customer gets a reminder before payment is due	SHOULD	Customer	Yes (email only)	Ready (next day)
UAT-C-04	US-20	A fleet customer's agreed rate applies automatically	SHOULD	Sales Rep	Yes	Ready
UAT-F-01	US-21	One dashboard for sales, stock, finance and service	COULD	Management	Yes	Ready
UAT-E-07	US-22	Satisfaction score 1 to 10 on a closed case	SHOULD	CS Agent	Yes	Ready
UAT-A-02	US-23	Same qualifying questions for every walk-in	SHOULD	Front Desk / Sales Rep	Yes	Ready
UAT-E-07	US-24	Satisfaction trend over time	SHOULD	Head of CS	Yes	Ready
UAT-C-05	US-25	No discount on an instalment sale	SHOULD	Sales Rep	Yes	Ready

Script	Story	Scenario	Priority	Role	Built?	Status
UAT-B-04	US-26	Finance sees stock, models and list prices (read only)	SHOULD	Head of Finance	Yes	Ready
—	US-27	(Check the v8 workbook for this story and add its script)	—	—	To check	—
UAT-D-06	US-28	Part, short and extra payments	SHOULD	Finance Team	Yes	Ready
UAT-D-07	US-29	Instalment rules: 30% down, 12 months, guarantor, sign-off	SHOULD	Finance Team, Head of Finance	Yes	Ready
UAT-A-03	US-30	Walk-in goes to the next free rep, without duplicates	SHOULD	Front Desk	Yes	Ready
UAT-A-04	US-31	Instagram enquiries with no visit booked are listed	SHOULD	Social Media Handler	Yes	Ready
UAT-A-05	US-32	Manager sees where deals are stuck	SHOULD	Showroom Manager	Yes	Ready
UAT-E-08	US-33	An unanswered case escalates itself after 1 hour	SHOULD	Head of CS	Yes	Ready
UAT-E-01	US-34	Customer gets a reference number for their request	SHOULD	Customer	Yes	Ready
UAT-E-09	US-35	Customer is told when their case changes	SHOULD	CS Agent	Yes	Ready
UAT-D-08	US-36	Unrecoverable default escalated to Legal	SHOULD	Head of Finance, Legal	Yes	Ready
UAT-D-09	US-37	Completion email when the plan is paid off	COULD	Finance Team	Yes	Ready
UAT-B-05	US-38	Import request when a model is out of stock	SHOULD	Sales Rep, Showroom Manager, Finance	Yes	Ready
UAT-C-06	US-39	Change vehicle or payment type before collection	SHOULD	Sales Rep, Head of Finance	Partly (to check)	Blocked until checked
UAT-S-01	Security	Each role sees only its own tabs and actions	MUST	Each role	Yes	Ready
UAT-S-02	Security	Locked actions: only the right person can sign off, approve or edit	MUST	Several	Yes	Ready
UAT-E2E-01	Journey	Website enquiry to sale, deposit, sign-off, car sold and first payment	MUST	Several	Yes	Ready
UAT-E2E-02	Journey	Website complaint to case closed and measured	MUST	Several	Yes	Ready

10. The scripts

Each script has a header, then a step table. **Actual** and **Pass/Fail** stay empty until the script is run.

A. Enquiries and prospects

UAT-A-01: A website enquiry reaches an online rep automatically (US-11)

Traces: Goal O3 · Story US-11 · Criterion: a new enquiry is assigned to an available rep without anyone noticing it first. **Tester:** Customer (website), then Sales Rep. **Scenario:** A customer asks about a car on the website after hours of searching; a rep who is logged in gets it straight away. **Test data:** TD-05, a car from TD-10.

Step	What to do	Expected	Actual	Pass/Fail
1	As the Sales Rep, log in and stay logged in	The rep's Home page opens		
2	In a private window, open the website and fill in **Sales enquiry** with your name, phone or email, and a car. Submit	A thank-you message shows		
3	Wait up to 5 minutes. As the Sales Rep, open **Leads > My Leads**	The enquiry is there, owned by the rep, Channel = Web, with the chosen car and **Auto Assigned At** filled in		
4	Check the rep's email or notifications	A "lead assigned to you" message		

UAT-A-02: Same qualifying questions for every walk-in (US-23)

Traces: Goal O2 · Story US-23 · Criterion: every walk-in is asked the same questions, and the answers are saved. **Tester:** Front Desk (or Sales Rep). **Scenario:** A new customer walks in. **Test data:** TD-04 Amina Sule.

Step	What to do	Expected	Actual	Pass/Fail
1	**Leads > New**. Enter name, phone, Channel = **Walk-in**	The form shows Qualification Answers, Visit Purpose and Vehicle Model of Interest		
2	Fill in the qualifying answers and Visit Purpose = Purchase, pick a model, save	The lead saves		
3	As the Sales Rep, open the lead and click **Convert** with Visit Purpose cleared	Conversion is refused until the purpose (and for a purchase, the vehicle) is filled in		

UAT-A-03: Walk-in goes to the next free rep, without duplicates (US-30)

Traces: Goal O2, O3 · Story US-30 · Criterion: a walk-in is assigned to a rep automatically; a returning or high-profile customer goes to the manager; the same person isn't entered twice. **Tester:** Front Desk. **Test data:** TD-04 (new), TD-01 Daniel Okoro (returning).

Step	What to do	Expected	Actual	Pass/Fail
1	Create a new walk-in lead for a new person, save	**Lead Owner** is a sales rep, picked automatically		
2	Create a lead for **Daniel Okoro** with his existing phone number	A warning that a matching record already exists		
3	Create a walk-in lead marked returning or high profile	It goes to the Showroom Manager, not a general rep		

UAT-A-04: Instagram enquiries with no visit booked (US-31)

Traces: Goal O3 · Story US-31 · Criterion: social enquiries without a booked visit can be followed up from one list. **Tester:** Social Media Handler. **Test data:** a new Instagram enquiry.

Step	What to do	Expected	Actual	Pass/Fail
1	**Leads > New**, Channel = **Instagram**, no Booked Visit Date, save	It saves		
2	Open **Leads > AutoDrive - Enquiries No Visit Booked**	The new enquiry is listed		
3	Enter a Booked Visit Date on it, save, open the list again	It is no longer listed		

UAT-A-05: Manager sees where deals are stuck (US-32)

Traces: Goal O4 · Story US-32 · Criterion: one view of open prospects with source, rep and stage. **Tester:** Showroom Manager.

Step	What to do	Expected	Actual	Pass/Fail
1	**Leads > AutoDrive - Open Prospects**	Each open lead shows channel, owner and status		
2	**Leads > AutoDrive - Prospects With No Rep**	Leads without a rep (if any)		
3	**Opportunities > All Open Opportunities**	Each open sale shows owner, stage and approval status		

B. Vehicles and stock

UAT-B-01: A sold car shows Sold at once and can't be sold again (US-01)

Traces: Goal O1, O2 · Story US-01 · Criterion: when a sale closes, the car's status changes with no one editing it. **Tester:** Sales Rep. **Test data:** Sale 1 and Sale 3 (fresh set).

Step	What to do	Expected	Actual	Pass/Fail
1	Open **AD Rerun … Sale 1 (open)**, note the vehicle	The vehicle shows Available or Reserved		
2	Set Stage to **Closed Won**, save, then click the vehicle	Status is **Sold**; nobody edited the car		
3	Open **Sale 3**, edit **Vehicle** and search for the car from step 2	The sold car is not offered		
4	Open a sale where the deposit is paid (TD-28 Ngozi), note its car; on another open sale try to pick that car	Refused: "That car is reserved for another customer's sale…"		

UAT-B-02: Live availability (US-07)

Traces: Goal O1 · Story US-07. **Tester:** Sales Rep.

Step	What to do	Expected	Actual	Pass/Fail
1	**AM Vehicles > All**	Every car shows Available, Reserved or Sold, with model, colour and year		
2	Try to edit a car	The rep can view but not change it		

UAT-B-03: Low-stock alert (US-12)

Traces: Goal O3, O4 · Story US-12 · Criterion: the manager is told once when a model drops below its threshold. **Tester:** Showroom Manager. **Test data:** TD-11.

Step	What to do	Expected	Actual	Pass/Fail
1	Open a Vehicle Model, set **Low Stock Threshold** above its Available Stock, save	It saves		
2	**(next day)** check the bell	One low-stock notification for that model		
3	Open **Vehicle Models > AutoDrive - Low Stock**	The model is listed		
4	**(day after)** check the bell again	No repeat alert for the same model		

UAT-B-04: Finance sees stock, models and prices (US-26)

Traces: Goal O1 · Story US-26. **Tester:** Head of Finance.

Step	What to do	Expected	Actual	Pass/Fail
1	Open **AM Vehicles** and **Vehicle Models**	Stock and list prices are visible		
2	Try to edit a car or a price	Not allowed (read only)		
3	Open **AutoDrive - Models With No List Price**	Models missing a price are listed (if any)		

UAT-B-05: Import request when a model is out of stock (US-38)

Traces: Goal O1, O3 · Story US-38 · Criterion: the request is recorded against the customer and model; Finance and head office see it; stock goes up when the cars arrive; the rep is told. **Tester:** Sales Rep, then Showroom Manager, then Finance Team. **Test data:** TD-12.

Step	What to do	Expected	Actual	Pass/Fail
1	As the rep, on a customer, **Import Requests > New**. Pick the model, Quantity 2, Reason = Out of stock. Save	Saves as Requested; Requested By is the rep		
2	Try to save one without a reason	Refused, with a message		

Step	What to do	Expected	Actual	Pass/Fail
3	As Finance, open the request and move it on step by step to **Imported**	Each step saves		
4	Open the model	Available Stock has gone up by 2 (new cars named IMP-…)		
5	As the rep, check notifications / email	A notice that the cars arrived		

C. Sales and discounts

UAT-C-01: See where a discount approval sits (US-02)

Traces: Goal O2, O3 · Story US-02 · Criterion: each approval shows its current step and when it reached it; 5% or less is approved at once. **Tester:** Sales Rep, then Showroom Manager. **Test data:** Sale 1 and Sale 3.

Step	What to do	Expected	Actual	Pass/Fail
1	As the rep, on Sale 1 click **Request Discount**, rate 5%, give a reason	Approved straight away (Auto Approved ticked)		
2	On Sale 3, request **7.5%** with a reason	Current Step = **With Showroom Manager**, with the date and time		
3	Open the request	It shows the customer, each vehicle with its own list price, the total, the discount value and the price after discount		
4	As the Showroom Manager, **Home > Items to Approve**, approve it	Step moves to **With Finance**, new date and time; the sale's Approval Status updates		
5	Request another above 5% and have the manager **Reject** it	The rep sees Rejected on the sale		

UAT-C-02: Finance sees what is waiting for them (US-08)

Traces: Goal O3 · Story US-08. **Tester:** Finance Team, then Head of Finance.

Step	What to do	Expected	Actual	Pass/Fail
1	As Finance, **Home > Items to Approve**	The request from UAT-C-01 step 4 is listed with its date		
2	Approve it	Step moves to **With Head Office** at once		
3	As the Head of Finance, approve it	Status **Approved**; Approved By and Approved On filled in		

UAT-C-03: A fleet customer's information in one place (US-16)

Traces: Goal O1 · Story US-16. **Tester:** Sales Rep. **Test data:** TD-02 Lagos Ride Hailing Ltd.

Step	What to do	Expected	Actual	Pass/Fail
1	Open **Lagos Ride Hailing Ltd**	Contact person, agreed discount rate, owner and past sales on one page		
2	On an open fleet sale, **Add Fleet Vehicles**: pick a type and how many	That many identical cars are added and Reserved; totals update		
3	Ask for more cars of a type than are in stock	Refused, with a suggestion to raise an import request		
4	On a sale for an individual, try to add fleet vehicles	Refused: fleet sales only		

UAT-C-04: Fleet agreed rate applies automatically (US-20)

Traces: Goal O2 · Story US-20. **Tester:** Sales Rep. **Test data:** TD-02.

Step	What to do	Expected	Actual	Pass/Fail
1	On a fleet sale, **Request Discount**, leave the rate blank, save	The account's agreed rate is filled in automatically, worked out on the fleet total		

UAT-C-05: No discount on an instalment sale (US-25)

Traces: Goal O2 · Story US-25. **Tester:** Sales Rep. **Test data:** Sale 2 (7.5% approved).

Step	What to do	Expected	Actual	Pass/Fail
1	On an instalment sale, try **Request Discount**	Refused, with a message saying why		
2	Open Sale 2, change Payment Mode to **Instalment**, save	The approved discount becomes **Invalidated**		

UAT-C-06: Change vehicle or payment type before collection (US-39) — Blocked until checked

Traces: Goal O2 · Story US-39 · Criterion: money paid carries over; the difference is settled; a refund needs Head of Finance approval. **Tester:** Sales Rep, then Head of Finance.

Step	What to do	Expected	Actual	Pass/Fail
1	On a sale with a payment, change the vehicle to a cheaper one	The amount paid carries over and a refund is shown as needing approval		
2	As the Head of Finance, approve the refund	The refund is recorded with who approved it		
3	Change a sale from instalment to full payment	Earlier payments count towards the full price		

D. Finance and payments

UAT-D-01: Payment recorded once, balances update themselves (US-03)

Traces: Goal O2, O3 · Story US-03. **Tester:** Finance Team. **Test data:** TD-21 Segun Ajayi.

Step	What to do	Expected	Actual	Pass/Fail
1	Open **AM Instalment Plans > All**, open **Segun Ajayi**'s plan > Related > Instalments > **Month 2 of 6**	Balance 3,800,000		
2	Click **Record Payment**, keep the amount, record	Amount Paid 3,800,000, Balance 0, Status Paid; Recorded By and the date filled in		
3	Back on the plan, look at **Where This Plan Stands**	Month 2 shows PAID; Next Step names Month 3		
4	On a sale whose deposit is already recorded, click **Record Down Payment** again	Refused: the down payment is already recorded		

UAT-D-02: One list of late and defaulting customers (US-05)

Traces: Goal O4 · Story US-05. **Tester:** Head of Finance. **Test data:** TD-24, TD-25, TD-26.

Step	What to do	Expected	Actual	Pass/Fail
1	**AM Instalment Plans > Needs Attention**	Funke Ayo and Folake Ogunleye (Late) and Suleiman Bello (Defaulted) are listed		
2	Open Funke's plan	Next Step says how many days late, how much is owed and what to do; Month by Month shows each month		

UAT-D-03: Bank total against recorded payments (US-09)

Traces: Goal O2 · Story US-09. **Tester:** Head of Finance.

Step	What to do	Expected	Actual	Pass/Fail
1	**AM Reconciliation Entries > New**: a Date and a Bank Total different from the payments that day. Save	Recorded Total fills itself; the Difference shows; Status **Flagged**		
2	Check the bell (Finance and Head of Finance)	An alert: bank and recorded payments do not match		
3	Set Status to **Explained** with Note empty	Refused: write the cause in Note		
4	Write a note, set Explained, save	Saves as Explained		

UAT-D-04: Reminder 3 days before a payment is due (US-15, US-19) — (next day)

Traces: Goal O3 · Stories US-15, US-19. **Tester:** Finance Team. **Test data:** TD-20 Chiamaka Okonkwo (email: tester's inbox).

Step	What to do	Expected	Actual	Pass/Fail
1	The day before Chiamaka's Month 1 is 3 days away, note it is unpaid	Month 1 shows "upcoming"		
2	**(next day)** open her plan	Month by Month shows "Sent: reminder email" with the date		
3	Check the tester's inbox	A reminder with the amount and due date		
4	Check a month that is already paid	No reminder was sent for it		

UAT-D-05: Alert when a customer first defaults (US-17) — (next day)

Traces: Goal O3 · Story US-17. **Tester:** Finance Team. **Test data:** TD-25 Folake Ogunleye.

Step	What to do	Expected	Actual	Pass/Fail
1	Before the job: open Folake's plan	Month 1 is LATE by 30+ days; plan Late		
2	**(next day)** open the plan again	Month 1 DEFAULTED, plan **Defaulted**, "Finance alerted"		
3	**(day after)** check	No second alert for the same month		

UAT-D-06: Part, short and extra payments (US-28)

Traces: Goal O2 · Story US-28 · Criterion: a payment of 475 against 500 is recorded with what remains. **Tester:** Finance Team. **Test data:** TD-20 Chiamaka Okonkwo.

Step	What to do	Expected	Actual	Pass/Fail
1	Month 1 of 6 > Record Payment > **2,000,000** (due 2,500,000)	Balance **500,000** owed; Month by Month "part paid: 2,000,000"		
2	Month 2 of 6 > Record Payment > **3,000,000**	PAID, "500,000 extra, kept as credit"		
3	On a plan not yet signed off (TD-23 before sign-off), try Record Payment on a month	Refused: the Head of Finance has not signed off the plan		

UAT-D-07: Instalment rules (US-29)

Traces: Goal O2 · Story US-29 · Rules: 30% down, 12 months max (no exceptions), guarantor with income check before sign-off, only the Head of Finance signs off, sale can't close before deposit and sign-off. **Tester:** Head of Finance, then Finance Team. **Test data:** TD-28 Ngozi, TD-23 Hauwa, TD-27 Zainab.

Step	What to do	Expected	Actual	Pass/Fail
1	On Ngozi's plan set Term in Months to **13**, save	Refused: no longer than 12 months		
2	Set Down Payment % to **20**, save	Refused: at least 30%		
3	As Finance, open Hauwa's plan	The Head of Finance Sign-off box cannot be edited		
4	As the Head of Finance, tick Sign-off on Hauwa's plan	Signed Off By and Signed Off On fill themselves; status Awaiting Sign-off > Active		
5	Untick a guarantor's **Income Check Done**, then try to sign off a plan using that guarantor	Refused: income check must be done first		
6	Open Zainab's sale, set Stage **Closed Won**	Refused: needs the deposit and the sign-off first		

UAT-D-08: Legal escalation (US-36)

Traces: Goal O2, O3 · Story US-36 · Criterion: escalation needs 90+ days unpaid, guarantor unable, Finance approval; saving it notifies Legal with the name, months defaulted and amount owed. **Tester:** Head of Finance, then Legal Team. **Test data:** TD-26 Suleiman Bello; TD-25 Folake for the refusal.

Step	What to do	Expected	Actual	Pass/Fail
1	Open Folake's plan > **Raise Legal Escalation**	Refused: no month is 90+ days unpaid		
2	Open Suleiman's plan > **Raise Legal Escalation**; answer Yes to both questions; enter months defaulted and amount owed	The escalation is raised and the screen says Legal was notified		

Step	What to do	Expected	Actual	Pass/Fail
3	Refresh the plan	Plan Status **With Legal**; Related > Legal Escalations shows it with **Legal Team Notified At**		
4	As Legal, **Legal Escalations > All**, open it	Customer, months defaulted and amount owed; view only		

UAT-D-09: Completion email (US-37)

Traces: Goal O3 · Story US-37. **Tester:** Finance Team. **Test data:** TD-22 Emmanuel Udo.

Step	What to do	Expected	Actual	Pass/Fail
1	Month 3 of 3 > Record Payment > keep the amount	Plan **Completed**; Completion Email Sent ticked		
2	Edit and save the plan again	No second email		

E. Customer service

UAT-E-01: A request becomes a case with a reference number, and goes to the right team (US-06, US-34)

Traces: Goal O1, O3 · Stories US-06, US-34. **Tester:** Customer (website), then CS Agent. **Test data:** TD-05.

Step	What to do	Expected	Actual	Pass/Fail
1	On the website, **Contact support**, topic **Payments or my instalment plan**, submit	A reference number on screen and an email with the same number		
2	Submit two more: **Buying a vehicle or my order**, then **A problem with my vehicle**	A reference number each time		
3	As the CS Agent / Head of CS, **Cases > All Open Cases**	Payments > Finance; Buying > Showroom; Problem > Customer Service (Routed To filled in)		

UAT-E-02: Agent sees history, not payment amounts (US-04)

Traces: Goal O1 · Story US-04. **Tester:** CS Agent. **Test data:** TD-01 Daniel Okoro.

Step	What to do	Expected	Actual	Pass/Fail
1	Search **Daniel Okoro** by name or phone, open the account	Purchases, cases and messages on one record		
2	Look for prices or payment amounts	None are shown; view only		

UAT-E-03: Every case's owner and status (US-10)

Traces: Goal O4 · Story US-10. **Tester:** Head of CS.

Step	What to do	Expected	Actual	Pass/Fail
1	**Cases > All Cases**	Every case has one owner and one status		
2	Leave the CS Agent logged in; submit "A problem with my vehicle" on the website; wait up to 5 minutes	The case is the agent's automatically (Auto Assigned At filled in)		

UAT-E-04: First response and resolution times (US-13)

Traces: Goal O4 · Story US-13. **Tester:** CS Agent, then Head of CS.

Step	What to do	Expected	Actual	Pass/Fail
1	Reply to a case, then close it	First Response At and Resolved At filled in; the automatic acknowledgement does not count		
2	Run report **AD Cases by Status**	The case shows with its times		

UAT-E-05: Search the knowledge base (US-14)

Traces: Goal O3 · Story US-14. **Tester:** CS Agent.

Step	What to do	Expected	Actual	Pass/Fail
1	**Knowledge Articles**, search a keyword	Published articles with the issue and the agreed answer		

Step	What to do	Expected	Actual	Pass/Fail
2	Try to edit an article	Not allowed		

UAT-E-06: Head of CS maintains articles (US-18)

Traces: Goal O5 · Story US-18. **Tester:** Head of CS.

Step	What to do	Expected	Actual	Pass/Fail
1	Edit an article, save	The change shows at once		
2	Set another to **Retired**	Hidden from agents, not deleted		

UAT-E-07: Satisfaction score and trend (US-22, US-24)

Traces: Goal O4 · Stories US-22, US-24. **Tester:** CS Agent, then Head of CS.

Step	What to do	Expected	Actual	Pass/Fail
1	On a closed case enter CSAT Score **11**, save	Refused: 1 to 10		
2	Enter **8**, save	Saves		
3	As Head of CS, run **AD Satisfaction Scores**	Scores over time with the number of ratings; blank is not counted as low		

UAT-E-08: An unanswered case escalates itself (US-33)

Traces: Goal O3 · Story US-33. **Tester:** Head of CS.

Step	What to do	Expected	Actual	Pass/Fail
1	Leave a new case with no reply for over **1 hour**	Priority High, Escalated At filled in, Head of CS flagged		
2	Check a closed case	Closed cases do not escalate		

UAT-E-09: Customer told when the case changes (US-35)

Traces: Goal O3 · Story US-35. **Tester:** CS Agent.

Step	What to do	Expected	Actual	Pass/Fail
1	Set a case to **Working**, then **Closed**	One status update and one resolution message under Customer Messages, each with the time sent		
2	Change only the owner	No message is sent		

F. Management

UAT-F-01: One dashboard for the whole business (US-21)

Traces: Goal O4 · Story US-21. **Tester:** Management.

Step	What to do	Expected	Actual	Pass/Fail
1	Open Home / the Management dashboard	Sales, stock, finance and service figures together, no errors		
2	Compare one stock figure with the model record	They agree		
3	Try to edit a record	Read only		

Security and access

UAT-S-01: Each role sees only its own tabs and actions

Traces: Goal O2 · Security matrix. **Tester:** each role in turn.

Step	What to do	Expected	Actual	Pass/Fail
1	Log in as each role in section 4	Only that role's tabs show (per the security matrix)		
2	As the Sales Rep, look for Payments, Instalment Plans, Reconciliation	Not visible		
3	As the CS Agent, look for prices on a sale	Not shown		

UAT-S-02: Locked actions

Traces: Goal O2 · Security matrix, US-29, US-02. **Tester:** several.

Step	What to do	Expected	Actual	Pass/Fail
1	As Finance, open a plan	Sign-off, Signed Off By and Signed Off On cannot be edited		
2	As the Head of Finance, open a sale	No edit pencils on the sale; no Request Discount button		
3	As the Sales Rep, open your own discount request	No Approve button		
4	As any user, edit a record's name (e.g. a plan) and save	The automatic name is kept		

End-to-end journeys

UAT-E2E-01: Website enquiry to sale, deposit, sign-off, car sold and first payment

Traces: Goals O1–O4 · Stories US-11, US-23, US-01, US-25, US-29, US-03. **Test data:** TD-05, a car from TD-10.

Step	Who	What to do	Expected	Actual	Pass/Fail
1	Customer	Sales enquiry on the website	Thank-you message		
2	Sales Rep	Find it in My Leads, fill the qualifying answers, convert with the car	A sale is created		
3	Sales Rep	Payment Mode = Instalment, 6 months; try Request Discount	Discount refused; 30% deposit filled in; Finance notified		
4	Finance	Plans To Set Up > Create Instalment Plan with a guarantor	Plan Awaiting Sign-off; 6 months created		
5	Finance	Record Down Payment	Car **Reserved**; Next Step: waiting for sign-off		
6	Head of Finance	Tick sign-off	Name and date stamped; plan Active		
7	Sales Rep	Stage **Closed Won**	Car **Sold**		
8	Finance	Record Payment on Month 1	Month 1 Paid; Next Step names Month 2		
9	Management	Open the dashboard	The sale and the payment appear		

UAT-E2E-02: Website complaint to case closed and measured

Traces: Goals O3, O4 · Stories US-06, US-34, US-11, US-13, US-35, US-22, US-21.

Step	Who	What to do	Expected	Actual	Pass/Fail
1	Customer	Contact support, "A problem with my vehicle"	Reference number on screen and by email		
2	CS Agent (logged in)	Wait up to 5 minutes, My Cases	The case is the agent's		
3	CS Agent	Reply, set Working, then Closed	Status emails sent; First Response At and Resolved At filled		
4	CS Agent	Enter CSAT 8	Saves		
5	Head of CS	AD Cases by Status, AD Satisfaction Scores	The case counted with its times and score		

11. Results summary, defect log and sign-off

Results (fill in when testing ends)

Measure	Round 1	Round 2
Scripts run		
Scripts passed		
Scripts failed		

Measure	Round 1	Round 2
Scripts blocked		
MUST scripts passed		
Open Critical or High defects		
Open Medium or Low defects		

Results so far (internal round, 20–25 Oct 2026)

Role	Result
Sales Rep	15 of 16 passed, 1 skipped (Instagram list, no social leads yet)
Showroom Manager	7 of 7 passed
Finance Team	In progress
Head of Finance	Approvals, 30%, 12 months, sign-off rules, late list and reconciliation passed; legal escalation to run

Defect log (found during the internal round; all fixed and waiting for the tester's retest)

ID	Script and step	What happened	Severity	Owner	Status
DEF-01	UAT-S-02 / 1	Finance could tick the Head of Finance sign-off on a plan	Critical	Build team	Fixed, retest
DEF-02	UAT-S-02 / 2	The Head of Finance could edit and delete sales	Critical	Build team	Fixed, retest
DEF-03	UAT-D-01 / 4	A down payment could be recorded more than once	High	Build team	Fixed, retest
DEF-04	UAT-D-06 / 3	Monthly payments could be recorded before the plan was signed off	High	Build team	Fixed, retest
DEF-05	UAT-C-02 / 3	Approve and Reject failed on a discount (a car was on two sales)	High	Build team	Fixed, retest
DEF-06	UAT-D-02 / 1	Unpaid months were never marked Late, so the late list stayed empty	High	Build team	Fixed, retest
DEF-07	UAT-D-07 / 1–2	Fleet customers could go below 30% or past 12 months; the story allows no exceptions	High	Build team	Fixed, retest
DEF-08	UAT-D-03 / 1	Reconciliation totals were typed by hand and nobody was alerted	High	Build team	Fixed, retest
DEF-09	UAT-B-01 / 4	A single-car sale with a deposit left the car Available to other reps	High	Build team	Fixed, retest
DEF-10	UAT-D-08 / 2	The legal escalation screen had no button; "New" skipped its checks and the email to Legal	High	Build team	Fixed, retest
DEF-11	UAT-D-01 / 1	Instalments and payments were not listed on the plan	Medium	Build team	Fixed, retest
DEF-12	UAT-C-01 / 3	Discount requests did not show what was being discounted or its cost	Medium	Build team	Fixed, retest
DEF-13	UAT-D-07 / 4	A plan showed Active before it was signed off	Medium	Build team	Fixed, retest
DEF-14	UAT-D-06 / 3	Refused payment showed "unhandled fault" instead of a clear message	Low	Build team	Fixed, retest
CR-01	All	Record names were numbers only; now reference · customer · detail	Change	Hillary	Done
CR-02	UAT-D-02	Plan page shows Next Step and Month by Month	Change	Hillary	Done
